An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mrs. Georgann, Grunebach (reg. No. 33179) on September 28, 2005.

The application has been amended as follows:

In claim 1, line 11, after land mass, -- Wherein at least one of said first plurality of spot beams having a plurality of beam segment portions, said plurality of beam segment portions being independently adjustable in response to a condition, wherein said condition is heavy traffic routed through said satellite--has been added.

Claims 7-8 and 10 are deleted.

In claim 9, line 2, "8" has been deleted instead -1—has been inserted.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art of record Araki teaches a satellite system (33 and 32) operating over a land mass (a land mass 10 figures 3-4 and 7) comprising: a first satellite (33) generating a first plurality of spot beams directed at the land mass (plurality of beam directed to land mass (33-1-33-5), the first set of spot beams partially covering the land mass (33-1-33-5 set of spot beams partially covered the land mass 10, figures 3-4 and 7, column 4, lines 28-47 and column 5, lines 29-49). a second satellite (32) generating a second plurality of spot

Art Unit: 2684

beams, at land mass (spot beams 33-6 and 33-7 of figure 3-4 and 7 column 4, lines 28-47 and column 5, lines 29-49).

On the other hand, the present application specifically teaches the first plurality of spot beams and second plurality of spot beams in substantially ubiquitous coverage spot beams and said combination provide over the land mass wherein at least one of said first plurality of spot beams having a plurality of beam segment portions, said plurality of beam segment portions being independently adjustable in response to a condition, said condition is heavy traffic routed through said satellite.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tilahun B Gesesse whose telephone number is 571-272-7879. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung can be reached on 571-272-7882.

The Central FAX Number will change to 571-273-8300. This new Central FAX Number is the result of relocating the Central FAX server to the Office's Alexandria, Virginia campus.

Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number. To give customers time to adjust to the new Central FAX Number, faxes sent to the old number

(703-872-9306) will be routed to the new number until September 15, 2005. After September 15, 2005, the old number will no longer be in service and 571-273-8300 will be the only facsimile number recognized for "centralized delivery".

CENTRALIZED DELIVERY POLICY: For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner's Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
